# ADDITIONAL Designs

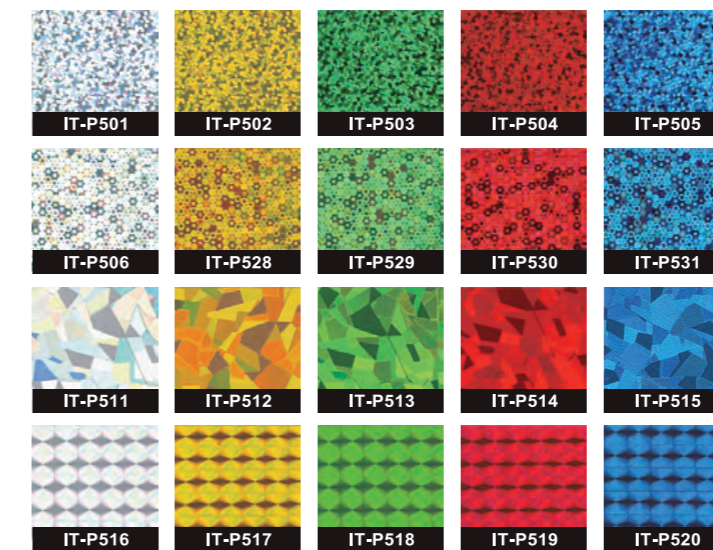

With the growing demand for a variety of decal features, we have applied our production and gaming knowledge to give you an attractive range of design options.

## Glitter

Glitter decals can make a basic design look more attractive. Glitter rings, logos, letters or denominations are an effective way to make chips more eye catching. Numerous glitter design types are available, but only one type per chip design can be used.

### Glitter type

Glitter Ring type 1

Glitter Ring type 2

Glitter Logo

Glitter Base

Mirror Gold

Mirror Silver

## Mirror Silver or Gold

Mirror Silver or Gold can give a similar appearance to our (Silver or Gold) coin chips. This effect is created using our unique ink range.

## Serial Numbers

We can add serial numbers onto the rim of the chips, decal, coin inlay as well as our gold and silver chips.

Serial Numbers

Serial Numbers

Serial Numbers

Serial Numbers

## Hologram

Why not try our new hologram decal to make a more eye-catching design? The hologram design is now common on many bank notes and passports, due to the difficulty in trying to replicate hologram properties. If holograms are good enough for bank notes, then why not have them on your cash chips!

# SECURITY Feature

To protect your gaming currency, Matsui offers many different security options for your gaming chips. From standard UV Marking, original MG Eye to state of the art RFID technology, the security features are available in several different grade and complexity. These security make Matsui Chips one of the safest choice for casino operators for their gaming currency.

## UV Marking

### ◆ Invisible UV Marking

Green or red ultraviolet markings can be added to both chips and plaques to prove their verification. The markings that can also be customized are only visible under a UV light.

Invisible UV Marking

### ◆ Visible UV Marking

Silver or gold printwork of the decal can be UV reflected. The printed colours will glow green or red under a UV light.

Visible UV Marking

## SECURE-EM-CHIP / Anti-Theft

The actual loss of gaming chips through internal theft is difficult for anyone to measure. With the MATSUI Secure-EM-Chip you can feel safe in the knowledge that no chips will be removed from the gaming floor without detection.

### ◆ Contentment for Managers and Security

Casino management can have peace of mind knowing that gaming chips will not be taken off the gaming floor by casino without their specific authorization.

### ◆ Alarm Activated

When the chips pass through strategically placed security sensors, the alarm is activated. These chips can also be detected by hand held security devices.

#### • HOW IT WORKS

Electronic Magnetic (EM) material is applied to the inside of the gaming chip. This then generates an invisible electro magnetic field that can trigger an alarm when it passes through electronic detection gates. Most casinos have a route that staff members must follow off the gaming floor. By using MATSUI's superb EM Chip with EM Gate, you can ensure superb detection and stop all casinos gaming chip theft.

Amorphous Magnetic EM Chip

EM Gate

## Laser Trace

This is the best solution for a quick check of your chips. By adding our security material to the base colour of your chip, the unique laser pen will show if the chip is genuine. This is ideal for checking chips in the float tray. We achieve this by mixing special reactants with the raw materials without affecting the colour of the chips. They will appear the same as the normal chips. The colour of the laser depends on the base colour. This is mainly expressed in green, however it can also be expressed in red depending on the base colour chosen. The Laser trace is also available on the chip decal. This is applied to all of the printed surface.

#### • HOW IT WORKS

Detecting the chip's face (Green color)

Detecting the chip's face (Red color)

Detecting the chips in a stack or float tray

Laser option on the decal

## Mould UV

The UV security feature can be applied to the mould so that it can be identified through a special detector. Maintain the unique point color of the chips. Quick verification available in large quantities as features are applied to the point color part. The UV security feature should be applied to the 2nd or 3rd colour of the chip. \* There is a difference in the degree of emission by the color of the injected raw materials.

Detector

Before lighting

After lighting

## MG EYE SECURITY PRINTING

A unique decal printing method, exclusive to MATSUI, lets us create a gaming chip impossible to duplicate.

### ◆ MG EYE Scanner

When chips are projected by lens, a print with special ink will be shown on LCD screen. The production time is unchanged from that of non MG Eye chips, so all Matsui chips are delivered at exceptional lead time. This device is available to use with AC adaptor or battery. If you connect RCA cable to the output terminal, the vision of LCD screen will be able to project to external monitor.

### ◆ Specifications

MG EYE Scanner	
Dimension	63 (W) x 162 (L) x 70(H) mm
Weight (without battery)	190g
Power Consumption	DC5V / 620mA

AC Adaptor	
Voltage	Input AC100-240V Output DC5V/2A

### • HOW IT WORKS

## RFID

Matsui 13.56 RFID Chips & System is the latest security system using radio frequency identification at 13.56Mhz. It's now possible to recognize a large volume of chips simultaneously under stable cash desk conditions. This will surely become an innovative new approach to your casino management. With these chips designed at 11g (weight) we then apply an electronic magnetic label to prevent robbery. This is based on the existing security environment. All the standard Matsui decal chips, plaques and jetons are now available with RFID.

It can protect your casino from counterfeit chips, whilst helping acquire information and confirmation about chip trading, stock situations and actual account of each table all in real time.

## Features

- ◆ HF RFID
  - Capable of recognizing many units quickly and at the same time.
  - Stable packaging structure and format safe from breakage.
- ◆ Grid Computing
  - Even when the chip is forged physically, the logic mechanism can perfectly control the chips.
  - Perfectly prevents information loss when there is hardware or network system trouble.
- ◆ Overcame RF Interference
  - Provides the hardware system with the algorithm which minimized the RF interface
  - Provides the method to control RF interference through software mechanism.
- ◆ Flexible Software System
  - Modules suitable for each system are provided that they can be easily operated with the existing casino management system (CMS)
  - The system is designed independently from RFID hardware.

## Expected Effects

- Prevention of forgery of casino chips
- Prevention of theft of casino chips
- Monitors various rule breaking activities in the casino
- Checks the stock of casino chips
- Real time monitoring casino trade status
- Real time settlement by each table
- Real time confirmation of betting, winning, and losing status for each customer

# PJM3.0 RFID™

WDTs is the world's largest supplier of RFID-enabled table games and casino cage solutions. Their products utilize patented PJM3.0 RFID technology to secure chip inventories, automate casino operations, support many configurable side bets, provide accurate player ratings, and capture player data for valuable business insights.

## Full Floor Automation with PJM 3.0™

At the core of WDTs' Perfect Pay™ smart table platform is Phase Jitter Modulation (PJM 3.0™) RFID — a breakthrough technology redefining how live table games are managed, protected, and optimized. Unlike conventional RFID systems that rely on signal strength, PJM 3.0™ encodes data through precise timing variations in the RF signal, delivering ultra-fast and highly reliable chip detection in high-density casino environments.

## Intelligent Tables. Measurable Results.

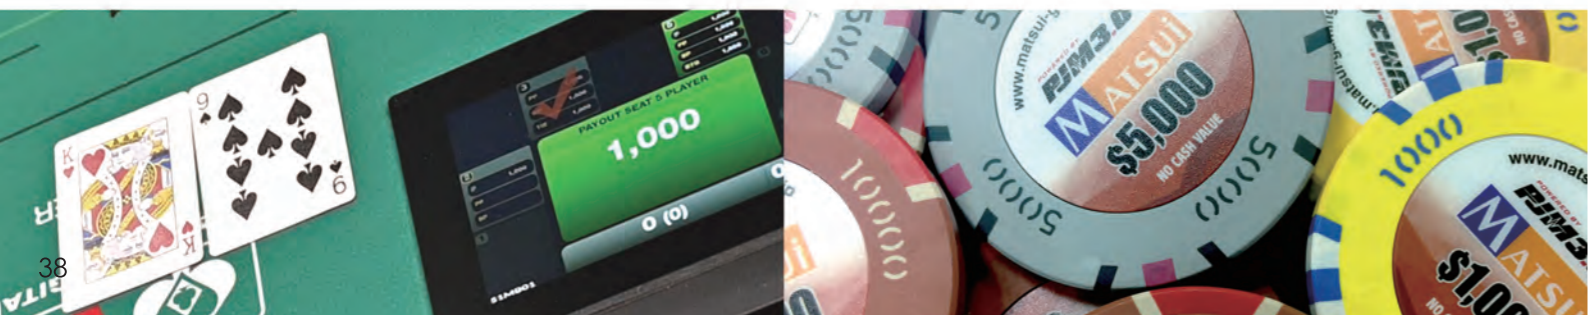

Perfect Pay™ transforms every wager into actionable intelligence. Each chip carries a universally unique ID(UUID), enabling real-time tracking of chip authentication, ownership, movement, and transaction status. Dealers operate faster, errors are reduced, and integrity is strengthened — while operators gain complete visibility across the floor.

## PROVEN FINANCIAL IMPACT

Automation increases game speed and table open time — while eliminating cheating, theft, and dealer error.

- Directly increases gross gaming revenue
- Expands market share
- Delivers ROI in under 12 months
- Improves performance without increasing foot traffic

Matsui is licensed to produce and supply gaming chips with PJM3.0 RFID. Matsui's PJM3.0 RFID chips have been already deployed and used by major operators all over the world. Please contact Matsui sales of your area.

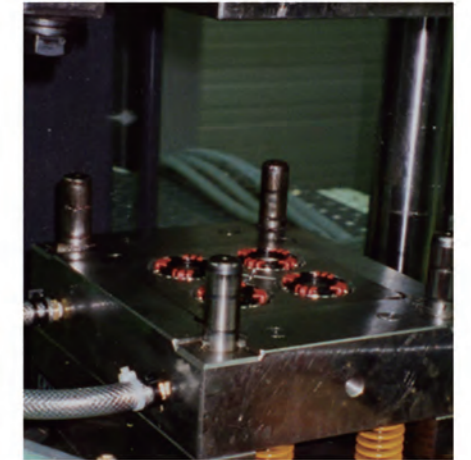

# SECURITY Manufacturing

The MATSUI complex on the outskirts of Seoul, Korea houses our purpose built chip manufacturing plant and modern offices. The manufacturing units and the dedicated staff are committed to increasing customer satisfaction through distribution of the world's highest quality gaming chips. This includes the customized marketing, careful design and precise production incorporating the latest innovative security features.

MATSUI uses a wide range of environmentally friendly materials. We also apply state of the art moulding techniques to manufacture the most accurately shaped and time tested gaming chips. The plant is extensively maintained, keeping a clean and temperature controlled environment, thus ensuring the quality of the chips are always kept to the highest possible standards.

The manufacturing units and the dedicated staff are committed to increasing customer satisfaction through distribution of the world's highest quality gaming chips. This includes the customized marketing, careful design and precise production incorporating the latest innovative security features.

When producing gaming chips, security is one of the most vital aspects to be considered. MATSUI solves this issue using a variety of methods.

Top range security cameras cover both the manufacturing line and the outside of the complex. All chips and materials used during the manufacturing process are secured in vaults only accessible to authorised personnel and 24hr security guards are in place both inside and outside the plant.

These precautions guarantee that any product cannot be removed from the plant without authorised approval.

All gaming chips data is stored in a management controlled setting to ensure all data is secure and repeat orders can be readily accommodated.

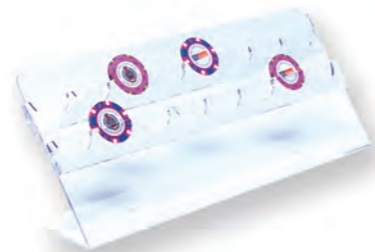

# CHIP ACCESSORIES

We can supply full range of accessories related to gaming chips. At your gaming tables and also for cage and backyard, Matsui can support you through all the aspect of your operation.

# NOVA GUARD Layout

NOVA GUARD LAYOUT by MATSUI ensures any part of the table layout cloth that comes into human contact in the casino is antimicrobial, therefore stopping the growth or spread of microorganisms.

- \* Identical feel, weight and quality finish with Matsui Heavy Weight Synthetic Layout
- \* With antimicrobial material added in the textile at the production stage whilst still allowing game / graphic design uniquely tailored to your casino
- \* Unlike the similar products which have only the surface of the cloth sprayed or coated by anti-viral solution; NOVA GUARD LAYOUT contains antimicrobial material woven into the fibre.
- \* Protection for not only a short period of time but instead constantly during the full period of use for your layout
- \* Offer a sanitized and safe environment at your gaming tables

# Antimicrobial Casino Chip NOVA GUARD CHIP PROTECT

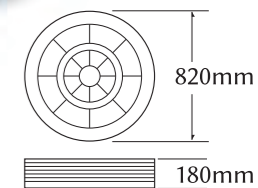

Available with all MATSUI Chips across the range with or without a decal and including Premier Decal Chips. NOVA GUARD CHIPS have a silver based antimicrobial agents added at the production stage that is effective against a broad spectrum of microbes. Registered at SIAA (Society of International sustaining growth for Antimicrobial Articles, Japan), the antimicrobial agent is extremely safe and USFDA approved for use. NOVA GUARD CHIPS have been laboratory tested for their effectiveness at disabling a variety of Bacteria and Viruses

- \* The same weight, feel and colours as standard Matsui Chips
- \* Effectively enhances the antimicrobial power of silver against a variety of microbes
- \* The same antimicrobial agents are widely and successfully applied to everyday household items, sports equipment, toys and textile products.
- \* Reduces the amount of cleaning required compared to standard gaming chips.
- \* Does not required to be cleaned by potentially damaging cleaning products like sterilizing with antiviral sprays or Ultraviolet Sterilizers.
- \* Additional reassurance for Casino staff and Customers that Bacteria and Viruses cannot live on the Chip or Decal surfaces.

# THE REVOLUTION Wheel

Elegant in design and finished with the world's finest veneers. Designed and manufactured in Japan, the MATSUI RevolutionWheel is a pre-requisite for any casino. Proven in tests, the new bearing assembly guarantees a spin rate, which is unsurpassed in its smoothness and duration. Equipped with a non-ferrous separator ring which can be indexed to 37 or 38 positions, the MATSUI Revolution Wheel is fully tamper proof for guaranteed security.

**The colours and design  
can be customized  
to suit your operation.**

- ① Turret machined and polished from solid metal and can be engraved with the casino name and logo.
- ② Adjustment bolt
- ③ Japanese designed and precision-engineered bearing assembly ensures a superior spin rate.
- ④ Cone finished with the finest veneers.
- ⑤ Non-ferrous CNC machined separator ring, capable of being indexed to 37/38 positions.
- ⑥ Rotor assembly machined to 0.1mm tolerances.
- ⑦ Ball track made from versatile heat resistant Bakelite, preventing wheel bias from premature wearing.

The Revolution is available with single or double zero. Font and colours can be customized.
